Note to the owners: A document available from the website of the artist and/or from the website of the DACollection/DASStore indicates all owners of the specific edition.

Owner's rights: The owner has the right to show the purchased item at exhibitions and other public events, provided that there is no entry fee or they serve an educational purpose. For events where entry is charged or for use for advertising purposes, conditions will apply as agreed with the artist.

The owner is permitted to make copies of the video for own use or as a back-up. The owner also has the right to play the film on the world wide web from their server, provided the artist is referenced. A reference piece is available on the artist's server or, if agreed, on the server of DACollection/DASStore in Basel.

Resale: The owner is permitted to sell the package as purchased. The part re-sale or the sale or distribution of copies is not permitted.

Upon change of ownership, the seller is requested to enter the change of owner's name to the online list of owners.

Technical description of item: *Frequency* is a film that can be played on an offline video screen, as well as on the collection's website. The film was designed aesthetically, in terms of its form and technically to be shown on the world wide web. Part of the piece are (1) a DVD with the film *Frequency*, which is playable on all DVD players, for offline use. The DVD sleeve for the 10-item edition was designed by the artist. (2) The second component is a CD-ROM with the required data for the online collection or buyer's website, respectively. An mpeg version of the film allows for the use of a video display from a usb flash drive.
